

Introduction

3Delight Cloud

Using 3Delight Cloud is really simple. In three steps you can render interactively with thousands of cores. Here is how it is done in *Maya*:

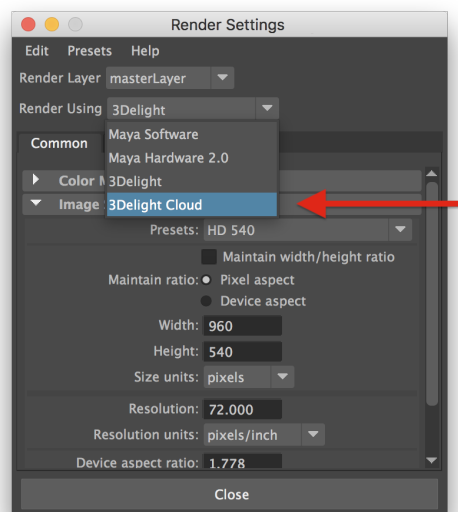

1

In 3Delight

Display

Sign in to your account.

The sign in dialog is in the right sidebar under the cloud tab.

2

In Maya

Select 3Delight Cloud as the renderer.

The option is in Maya's Render Settings dialog.

3

In Maya or 3Delight Display

Render as usual.

Renderings will be displayed, or saved, in the same manner as if launched without selecting 3Delight Cloud. It will work in *Maya's Render View* or in *3Delight Display*.

[Read more](#) on how to use 3Delight Cloud with other applications or using command lines.

Monitoring Cloud Rendering Activities

For monitoring as it happens, use the cloud tab in 3Delight Display's Sidebar. [Learn more >](#)

For monitoring past activities, check your account at [3Delight .com/cloud](https://3delight.com/cloud)
