

Batch Rendering

Using hqueue

Using 3Delight's **renderdl** Command Line

Offline rendering can also be launched using *3Delight*'s standalone renderer **renderdl** — provided the scene have been exported to a NSI File. To render a file named `file.nsi`, just type:

```
renderdl file.nsi
```

To read more about about the **renderdl** command line, refer to [Rendering NSI file](#).
