

# Thin

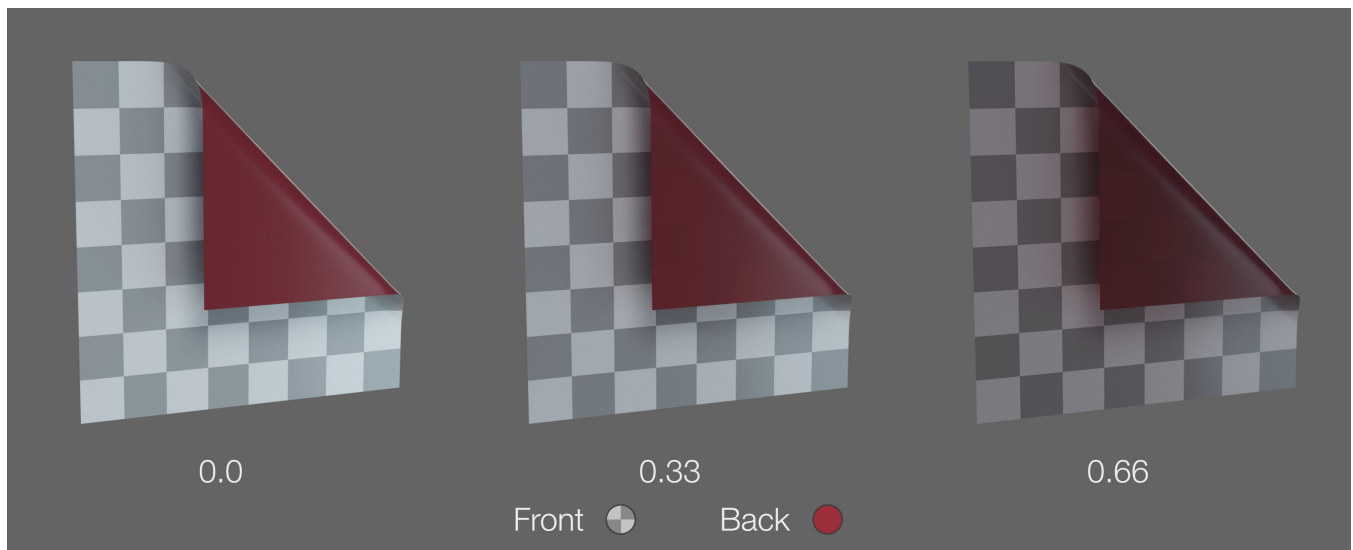

*The 3Delight Thin material.*

## Translucency

This parameter indicates the transparency of the material from the front and from the back.

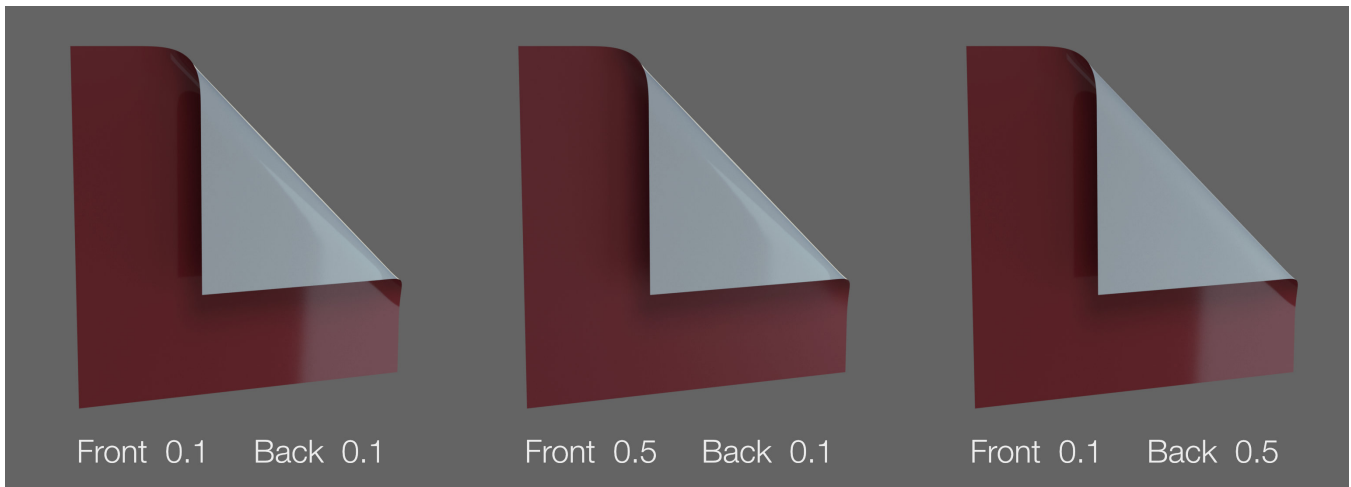

### Opacity

Sets the opacity of the surface.

### Roughness

Sets the roughness of the surface for each side. Range is [0..1] where 1 is very rough,

### Specular Level

Higher specular level makes the surface reflective and a lower specular level makes it more diffuse. Range is [0..1].

### Occlusion Distance
